BRAND STYLE GUIDE

The Brand at a Glance

Carlington & Burling LLP is a preeminent international law firm advising clients on their most complex legal challenges since 1919. Our identity expresses a century of trusted counsel: authoritative, restrained, and quietly confident. Every application of this brand should feel considered, precise, and unmistakably premium.

POSITIONING

Trusted Counsel. Proven Results. The visual language pairs a deep navy foundation with a refined gold accent — signalling heritage, stability, and prestige without ostentation.

PERSONALITY

Established · Authoritative · Discreet · Global · Enduring.

VOICE & TONE

Measured, intelligent, and discreet. We speak with the assurance of experience and never overstate. Clarity always outranks decoration.

FOUNDED

Washington, D.C., 1919 — by J. Harry Carlington and Edward B. Burling. Today: 1,300+ lawyers across 13 offices worldwide.

The Primary Logo

The primary horizontal lockup is the preferred expression of the brand. It pairs the **CB** crest monogram with the full serif wordmark and descriptor. Use it wherever space and legibility allow.

CLEAR SPACE

Maintain minimum clear space equal to the height of the crest monogram on all sides. Never crowd the logo with text or graphics.

MINIMUM SIZE

Do not reproduce the primary lockup below 38mm / 150px wide in print or screen to preserve descriptor legibility.

Logo Variants

Four approved variants cover every context. Choose the variant that best fits the format and background — never recreate or restyle the mark.

01 · PRIMARY HORIZONTAL

02 · STACKED / FORMAL

03 · MONOGRAM EMBLEM

04 · REVERSED (DARK BG)

WHEN TO USE EACH

Horizontal for letterhead, websites, signatures. **Stacked** for covers, plaques, formal documents.

Monogram for favicons, social avatars, seals. **Reversed** for navy or photographic backgrounds.

Colour Palette

Deep navy anchors the system; gold provides a single, deliberate accent. Neutrals carry the bulk of layouts to keep the palette disciplined and premium.

Carlington Navy
HEX #0A1628 · RGB 10/22/40

Primary brand colour. Backgrounds, headlines, the crest.

Midnight Slate
HEX #142340 · RGB 20/35/64

Secondary navy for panels, gradients and depth.

Heritage Gold
HEX #B08D57 · RGB 176/141/87

Accent only. Rules, the ampersand, key highlights.

Light Gold
HEX #C9A66B · RGB 201/166/107

Gold tint for reversed / dark-background contexts.

Ivory Paper
HEX #FAF9F6 · RGB 250/249/246

Default background. Warmer and softer than pure white.

Ink
HEX #1A1A1A · RGB 26/26/26

Body copy and fine print on light backgrounds.

PROPORTION

Approx. 60% navy · 20% ivory · 12% slate · 8% gold.

Typography

A classical serif for authority paired with a clean geometric sans for clarity. The contrast between the two carries the brand's blend of heritage and precision.

Logo Usage

Consistency protects the equity of the mark. Observe the following rules in every application.

✓ Do

- Use approved logo files at full opacity.
- Keep generous clear space around the mark.
- Use the reversed variant on navy or imagery.
- Reproduce gold and navy at the exact specified values.
- Scale the logo proportionally only.

✗ Don't

- Stretch, skew, or rotate the logo.
- Recolour the mark outside the palette.
- Place the light logo on busy or pale backgrounds.
- Add shadows, outlines, or effects.
- Recreate the wordmark in a different typeface.

CO-BRANDING & SPACING

When paired with partner marks, separate logos with a thin vertical gold rule and equal optical weight. The Carlington & Burling mark always leads in firm-issued materials.
